Description

Gizmo's Racing modified Walbro WT-1048 carburetor is bored and the mouth of the carb has a radius inlet to allow a smooth and even entry of air into the intake duct with the flow stream adhering to the carb walls.

The flow-contoured entry is designed to reduce boundary layer disturbance as high velocity air enters the intake path. Results include improved

air stability and increased engine performance.

**\*\*The carburetor also comes with the needle clamp\*\***

NOTE: THESE ARE PORTED ON A CNC MACHINE SO WE CAN GET PRECISE BORE SIZE EVERY TIME.

All our Carburetors are Genuine OEM Walbro and not the copies that are being sold as OEM.

Also we put our logo on all are Pro mod carbs to make sure you are getting the best
