Description

The Maclan Racing "Race Formula Graphene V3" battery is the latest 2020 chemistry. Maclan continuously evolves their batteries with the latest technology to improve capacity/weight ratio (for better physical spec) along with lower IR (for better discharge performance). These properties will provide more competitive performance for extreme racers.

The MCL6015 8500 mAh features reduced weight (6g), while retaining the same capacity and improved IR for better discharge curve in stock class competition.

Features:

- Better weight/ capacity ratio = Lighter weight with more power
- Better discharge curves = Better voltage holding at the end of race
- 7.6V (2S) nominal voltage
- 5mm bullet type connectors for maximum power throughput
- 10C maximum charge rate, 3C charge rate for the longest life span

Specifications:

- Length: 139mm
- Weight: 325g
- Depth: 25.1mm
