Description

The Jumpshot V2.0 features cool looks and stylish wheels that sets the V2.0 version apart from the original Jumpshot.

Underneath the body, the chassis is durable and a great-looking Savage-style TVP (Twin Vertical Plate) design that gives the Jumpshot drivers a tough, reliable truck, with a fun driving feel and great handling. The Saturn 12-turn, 550-size motor with enhanced gearing gives the truck amazing acceleration and fantastic punch at all speeds, so jumps and donuts are easy. To keep the fun going for hours and hours, the gearbox and gears are made from a heavy duty material and feature a design to help eliminate damage during hardcore bash sessions. Strong suspension and steering components add extra crash protection during all kinds of driving. The larger battery box is easily accessed from underneath the truck, so changing batteries for more fun driving is quick and easy - aided by the T-plug battery connector on the waterproof, LiPo-ready speed controller. This means you can blast through any type of terrain you want, whether it's grass, mud, asphalt, gravel or anything else.

Features:

- Factory-built, Pre-Painted and Ready To Run 2WD truck
- Tough aluminum TVP Twin Vertical Plate modular chassis design
- Waterproof LiPo-ready electronic speed controller
- Rubber-sealed ball bearings throughout the drivetrain and wheel hubs
- Battery box easily fits larger 7-cell battery NiMH packs or 2S LiPo
- T-plug battery connector
