Description

The newest member of the HPI x Vaughn Gittin Jr. collection is here, and it's the perfect little brother to the 1/10th scale HPI Mustang RTR-X Sprint 2 Sport and Nitro RS4 3 Evo+! This Micro RS4 is a scaled-down, 1/18th version of Vaughn's iconic 1969 Ford Mustang RTR-X, which was designed by Vaughn in partnership with the Need For Speed crew! Vaughn is the only one who can drive the real thing, but if you want an RC replica that can fit in the palm of your hand, this is the only version you'll be able to find!

The Micro Mustang RTR-X is perfect for shredding tires inside and outside, with a high-powered motor driving all four wheels and coil-over shocks providing smooth power and excellent control. This Ready To Run Micro RS4 kit features a highly detailed and scale 1969 Ford Mustang RTR-X replica body for an awesome scale look wherever you drive! Just like the 1/10th scale replica, we even include TWO SETS of wheels and tires, one for drifting and one for racing!

The HPI Micro RS4 is powered by an HPI 180-size motor, electronic speed control, full time 4WD belt drive and waterproof steering servo. It's ready to drive or drift straight out of the box, just like Vaughn Gittin Jr.'s full-size Ford Mustang!

Features:

- Drive: Four wheel belt driven, front universal dogbones, straight rear axle
- Motor: 180 size brushed
- Radio: TF-11 2.4GHz with waterproof SF-10W servo
- ESC: EN-2 with reverse
- Battery: 1200mAH 6.0V NiMH

Specifications:

- Length: 8.6" (220mm)
- Height: 3.1" (80mm)
- Width: 4" (105mm)
- Wheelbase: 5.5" (140mm) adjustable
