Description

The MINI-Z Racer allows anyone to enjoy the beautiful style and advanced performance of R/C cars. Includes the Syncro KT-531P transmitter with steering trim, throttle trim, dual rate, LED control function, and sponge grip to provide a comfortable fit and precision control feel. The body is finished to display-model quality that matches stunning style with the performance, reliability, and durability of the MR-03 chassis. The control program on the circuit board offers linear handling characteristics, and can be further enhanced for even easier control by installing the optional gyro unit (MZW431). This model represents the perfect package for a deep dive into the amazing world of R/C cars!

*Syncro KT-531P transmitter uses FHSS 2.4GHz and is not compatible with existing ASF/MHS/FHS 2.4GHz systems.

Features:

- Circuit board with control program.
- Highly detailed display-standard body is fully factory finished.
- Full ball bearing specifications include 7 bearings.
- Compatible with all MINI-Z Racer body styles.
- Front suspension incorporates VCS that optimizes camber angle w/ suspension stroke.
- Compatible with optional gyro unit (MZW431). Volume of gyro effect can be adjusted on the chassis.
