### Description

Previously known as the highly-regarded OFNA 10244 starter box, this unit can be configured to work with most 1/8th scale off-road truggies and buggies. Although designed to be powered by two 7.2v NiMH stick packs w/standard connectors or a 12-volt gel cell utilizing the included adapter, most racers change the included connectors to T-Plugs or XT60's and use a 3S or 4S LiPo battery for power. The starter box arrives 80% pre-assembled, requiring only final configuration to your choice of vehicle. Includes dual 775-size motors and all the pegs and hardware required for use. (Batteries not included).

### Features:

- Compact design
- Dual 775-size electric starter motors
- Adjustable front chassis support
- Built-in handle

### Specifications:

- Length: 318mm (12.5")
- Width: 121mm (4.75")
- Height: 76mm (3")
