Description

The Top-Force is back! This is a limited-edition re-issue of the Top-Force (2005) model, with one minor change - different tires are now included.

The 4WD buggy Top Force was initially released in 1991, to celebrate the release of Tamiya's 100th R/C car. Designers incorporated feedback and experience gained over the years to produce a purebred racer like no other! Designed to possess an ultra-low center of gravity, the Top Force sports a body that is both aerodynamic and cool to look at! The Top Force features front and rear sealed gearboxes, sandwiched between 2mm FRP plates for dependable durability. That style would later become a standard for R/C touring cars, demonstrating just how revolutionary Top Force was. Transmission system features a hard propeller shaft and front/ rear ball diff. Double wishbone suspension comes with 4 CVA shock dampers, and is designed for ultimate adjustability.
