Description

The Rage RC Taylorcraft is an ultra-micro sized model of Clarence Taylor's classic 1936 design, with a highly visible realistic trim scheme and

details like pre-decorated wheel pants, and a convenient magnetic hatch on the battery compartment which provides convenient access and improves scale appearance. The model features a symmetrical airfoil design to enhance the scale appearance and provide smooth, stable flight performance either indoors in gymnasium-size buildings, or outdoors in light winds, and that's ideal for both aspiring and experienced pilots.

The Taylorcraft comes fully assembled as an RTF (Ready-To-Fly), so everything needed to fly is included in the box. As with previous Golden Age series airplanes from Rage RC, the 3-in-1 control board arrives factory-installed with proportional servos for rudder and elevator control. The updated 2.4GHz transmitter features improved gimbals for enhanced flight control feel, and the 250mAh high-capacity battery and separate 300mAh USB charger combine to provide long flight times and fast charges, maximizing your time in the air. All you need to add are 4 AA batteries to power the transmitter and you can be making your maiden flight on this highly detailed, historic airplane within minutes of opening the box!

Specifications:

- Wingspan: 22.2 in (565mm)
- Length: 16.0 in (405mm)
- Wing Area: 75.95 sq. in. (4.9 sq. dm.)
- Weight with Battery: 2.1 oz (60 g)
- Battery: 250mAh 60C 1S 3.7V LiPo
- Transmitter: 4-channel 2.4GHz
- Onboard Electronics: 3-in-1 control board (receiver, servos, ESC)
