### Description

This is the Zenoah pullstart that makes it easy to start your engine. The pullstart is actually spring loaded so that it reduces effort normally required to pull-start the engine. You do not feel the hard snap when you pull the rope like the factory supplied starter as this one has a spring that you pull against that stores energy and releases all of the energy at once to spin the engine over faster and easier. screws and spacers Plate that spaces the pullstart to the correct spacing. It will work on a 260pum and 231pum.cy,quickdraw,rcmk. motors.

## Zenoah Marine Engine Parts: Zenoah e-z start
